

# Airside Driver Training

Developed in conjunction with UK Airport Operators, the Airside Driver Training (ADT) course ensures that students understand their roles and responsibilities to safely drive while airside, and their obligations while on duty at the airport.

This course promotes a safe working environment by ensuring all airside staff are aware of the dangers involved in driving, thereby reducing the risk of driving related accidents airside.

## Efficient and Effective Driver Training

Our ADT course is a comprehensive web-hosted training course that provides drivers operating airside with the information and skills they require to fulfil their duties with efficiency and confidence.

Designed for any member of staff who may be employed to operate a vehicle at the airport, each lesson within the ADT course introduces the user to a new aspect of the job role and explains in detail what is required from them while on duty.

This course is based upon the Civil Aviation Publication (CAP) 790 document and it represents an accepted way of operating safe working practices at airports and the contents of this course are a combination of both guidelines and directives.

## Partnering with the experts

At The Learning Academy we are continually looking for ways to provide our customers with the best functionality, in the most economic format. Training can be expensive, and the quality of instruction can vary from trainer to trainer. Our online training courses deliver high quality training, every time.

Scheduling training for a large work force no longer requires the cost of training rooms, or taking staff off the floor. Our courses are available 24 hours a day, 7 days a week, so training can be scheduled around staff availability and convenience...

# Reducing Costs

To keep our clients' training overheads down, we have priced our courses by the unit – if only 2 people require training, our clients only pay for 2 units, whereas a certified instructor often charge the same amount whether they are training 2 or 20 people.

We provide training managers with the best possible tools to educate their security staff by continually developing ground breaking technologies. Our products are designed with a strong focus on our customers' ever evolving needs and the shifting landscapes of the security industry.

## ADT course overview

Designed for any member of staff employed to operate a vehicle at the airport, including ramp operators. Each lesson introduces the user to a new aspect of the job role and explains in detail what is required from the them while on duty. Modules include:

- Airside safety
- Traffic rules
- Danger zones
- Procedures for dealing with accidents

Upon completion, each student must complete a multiple-choice exam. Thereafter the airport is responsible for the student's practical driving assessment. After successful completion of the practical assessment, the student can be awarded their ADP certification.

**Lesson 1:** Objectives

**Lesson 2:** Introduction

**Lesson 3:** Personal Protection Equipment

**Lesson 4:** Airside Permits

**Lesson 5:** Vehicle Requirements

**Lesson 6:** Airside Areas & Road Markings

**Lesson 7:** General Rules & Regulations

**Lesson 8:** Speed Limits & Incidents

## The Learning Academy

### Do you want the best training possible?

The Learning Academy provide the best on-line training systems in the world. Our track record is second to none and with over 18 years of experience, the Learning Academy Team know what they're talking about. We have proven our systems are the best in market sectors such as aviation, major events and justice environments where failure is not an option.

### Why do we do it?

It's simple. The team at The Learning Academy want to provide the best possible training, combined with excellent customer service. We know that being a provider of the best products and services will lead to a mutually beneficial relationship... and this is what drives us.

### How do we do it?

We provide products that are second-to-none and we deliver proven technology to satisfy our customers' rigorous requirements. Our products are the best, the easiest to use, the most productive, offer the best functionality and are delivered ultimately in the most economic format with which our customers can train users resulting in the best possible outcomes.
