

Our Checkpoint Security Training course ensures that employees understand their roles and responsibilities in relation to the safety of the Security Restricted Area (SRA), while on duty at an airport security checkpoint.

Designed for any member of staff employed to control access points, this course trains personnel to prepare people for security checks. It also covers searching bags and persons by hand and the use of X-Ray machines / metal detectors.

Based on the Department for Transport (DfT) syllabus for Security Operatives, the CST course meets the training prescribed by the DfT for those employed in security roles at checkpoints within an airport. Each lesson introduces users to a new aspect of the job role and explains what is required. Employing the very latest thinking in Computer Based Training (CBT) technology, our CST course ensures new-hire screeners receive the required levels of introductory training.

The most advanced technology is of little value if operators aren't appropriately trained. It is important to remember that despite the substantial progress in X-Ray imaging, the final decision on luggage that does or does not enter an aircraft is made by a human operator.

The course includes important subjects, including; an outline of the requirements and responsibilities when operating security equipment at the checkpoint, basic threat identification, X-Ray image recognition, effective customer service techniques, basic Profiling skills, hand wand operation, passenger search, baggage search, archway metal detector operation and passenger risk assessment.

The effectiveness of both security and pedestrian screening starts with the efficient training of new-hire screeners. The most expensive and advanced technology is of little value if the people operating it are not selected and trained appropriately. Human factors are still the essential key element at the security checkpoints and despite substantial progress in X-Ray imaging, the final decision whether personal belongings are allowed to enter the secure area is always made by a human operator.

Developed by Quadratica UK and employing the very latest thinking in Computer Based Training (CBT) technology, CST:ESS helps you ensure your new-hire screeners receive the appropriate and required levels of introductory training, including hand wand operation, pedestrian search, baggage search, image recognition, archway metal detector operation, pedestrian risk assessment, and much more...

The home of web-based training - courses available world-wide 24 hours a day, 7 days a week

Reducing Costs

By utilising the online availability of our CST:ESS course, you can organise training around your staff's spare time. And, as our CST:ESS online course is available 24 hours a day, 7 days a week, scheduling training for everyone at the same time is no longer a headache, each individual member of your team can undertake training whenever and where ever is most convenient.

Our online CST:ESS course will dramatically reduce your training overheads. The unit price of our course is extremely low and the course only costs as much as you use - if you only have one or two staff members that require training, all you need to pay for is 1 or 2 units. There are no other costs involved.

CST course overview

Trainee progress is monitored throughout the course via assessments compulsory to completion of the course. The complete course can consist of pure theory lessons as outlined below or combined with X-Screen Simulator practical sessions.

- Lesson 1:** The Threat to Aviation
- Lesson 2:** Maintaining Effective Security
- Lesson 3:** General Security Awareness
- Lesson 4:** SRA Access Control & Security
- Lesson 5:** Checkpoint Overview
- Lesson 6:** Threat Identification - IED's
- Lesson 7:** Threat Identification - Firearms
- Lesson 8:** Threat Identification - Sharps
- Lesson 9:** Preparing People for Security Checks
- Lesson 10:** Walk Through Metal Detectors
- Lesson 11:** Hand Held Metal Detectors
- Lesson 12:** Searching People
- Lesson 13:** Searching Baggage
- Lesson 14:** Using X-Ray Equipment
- Lesson 15:** Conventional X-Ray Equipment
- Lesson 16:** Image Recognition
- Lesson 17:** Threat Image Projection (TIP)
- Lesson 18:** Personal Risk Assessment

Quadratica

At Quadratica UK we are continuously looking for ways to provide our customers with the best functionality, in the most economic format. DFT training can be expensive, and the quality of instruction can vary from trainer to trainer. Our online training courses deliver high quality training, every time. Scheduling training for a large work force no longer requires the cost of training rooms, or taking staff off the floor. Our courses are available 24 hours a day, 7 days a week so training can be scheduled around staff availability and convenience.

To keep our clients' training overheads down, we have priced our courses by the unit – if only 2 people require training, our clients only pay for 2 units, whereas a certified instructor will often charge the same amount whether they are training 2 or 20 people. We provide training managers with the best possible tools to educate their security staff by continually developing ground breaking technologies. Our products are designed with a strong focus on our customers' ever evolving needs and the shifting landscapes of the security industry.
