

Checkpoint Security Training: Events & Secure Sites

Devised specifically for Events and Secure Sites, our Checkpoint Security Training course ensures employees understand their roles and responsibilities while on duty at an event / secure site security checkpoint.

Designed for any member of staff employed to control access points, this course trains personnel to prepare people for security checks, search bags and persons by hand and use X-Ray machines / metal detectors. Based on stringent security measures recognised around the world, each lesson in our course introduces users to a new aspect of the job role and explains what's required. The syllabus meets the training standards prescribed by multiple government organisations and should be used as a pre-cursor to practical training elements.

Efficient and effective checkpoint security

CST:ESS is a comprehensive web-hosted training course that provides security checkpoint operatives with the information and skills they require to fulfil their security duties with efficiency and confidence.

Trainee progress is monitored throughout the course via assessments compulsory to the completion of the course. The complete course can consist of either pure theory lessons, or theory combined with X-Screen simulator practical sessions.

- Requirements and responsibilities when operating security equipment at the checkpoint
- Basic threat identification
- X-Ray image recognition
- Effective customer service techniques
- Basic Profiling skills

Partnering with the experts

The effectiveness of both security and pedestrian screening starts with the efficient training of new-hire screeners. The most expensive and advanced technology is of little value if the people operating it are not selected and trained appropriately. Human factors are still the essential key element at the security checkpoints and despite substantial progress in X-Ray imaging, the final decision whether personal belongings are allowed to enter the secure area is always made by a human operator.

Developed by Quadratica UK and employing the very latest thinking in Computer Based Training (CBT) technology, CST:ESS helps you ensure your new-hire screeners receive the appropriate and required levels of introductory training, including hand wand operation, pedestrian search, baggage search, image recognition, archway metal detector operation, pedestrian risk assessment, and much more...

Reducing Costs

To keep our clients' training overheads down, we have priced our courses by the unit – if only 2 people require training, our clients only pay for 2 units, whereas a certified instructor will often charge the same amount whether they are training 2 or 20 people.

We provide training managers with the best possible tools to educate their security staff by continually developing ground breaking technologies. Our products are designed with a strong focus on our customers' ever evolving needs and the shifting landscapes of the security industry.

At Quadratica UK we are continually looking for ways to provide our customers with the best functionality, in the most economic format. Training can be expensive, and the quality of instruction can vary from trainer to trainer. Our online training courses deliver high quality training, every time.

Scheduling training for a large work force no longer requires the cost of training rooms, or taking staff off the floor. Our courses are available 24 hours a day, 7 days a week, so training can be scheduled around staff availability and convenience.

CST:ESS course overview

Trainee progress is monitored throughout the course via assessments compulsory to completion of the course. The complete course can consist of pure theory lessons as outlined below or combined with X-Screen Simulator practical sessions.

Lesson 1: Maintaining Effective Security

Lesson 2: Checkpoint Overview

Lesson 3: Threat Identification - IED's

Lesson 4: Threat Identification - Firearms

Lesson 5: Threat Identification - Sharps

Lesson 6: Preparing People for Security Checks

Lesson 7: Walk Through Metal Detectors

Lesson 8: Hand Held Metal Detectors

Lesson 9: Searching People

Lesson 10: Searching Baggage

Lesson 11: Using X-Ray Equipment

Lesson 12: Conventional X-Ray Equipment

Lesson 13: Image Recognition

Lesson 14: Threat Image Projection (TIP)

Lesson 15: Personal Risk Assessment

The Learning Academy

Do you want the best training possible?

The Learning Academy provide the best on-line training systems in the world. Our track record is second to none and with over 18 years of experience, the Learning Academy Team know what they're talking about. We have proven our systems are the best in market sectors such as aviation, major events and justice environments where failure is not an option.

Why do we do it?

It's simple. The team at The Learning Academy want to provide the best possible training, combined with excellent customer service. We know that being a provider of the best products and services will lead to a mutually beneficial relationship... and this is what drives us.

How do we do it?

We provide products that are second-to-none and we deliver proven technology to satisfy our customers' rigorous requirements. Our products are the best, the easiest to use, the most productive, offer the best functionality and are delivered ultimately in the most economic format with which our customers can train users resulting in the best possible outcomes.
